OVERVIEW

The purpose of this Mod is to remove the boring default icon and nameless description for saved game files generated by "Crusader Kings II".

The Icon is based on the traditional Templar Cross and the cross used by many other Holy Orders during the middle ages, supplanted on top of the generic Windows icon for any file on a PC.

Installation#$+kA

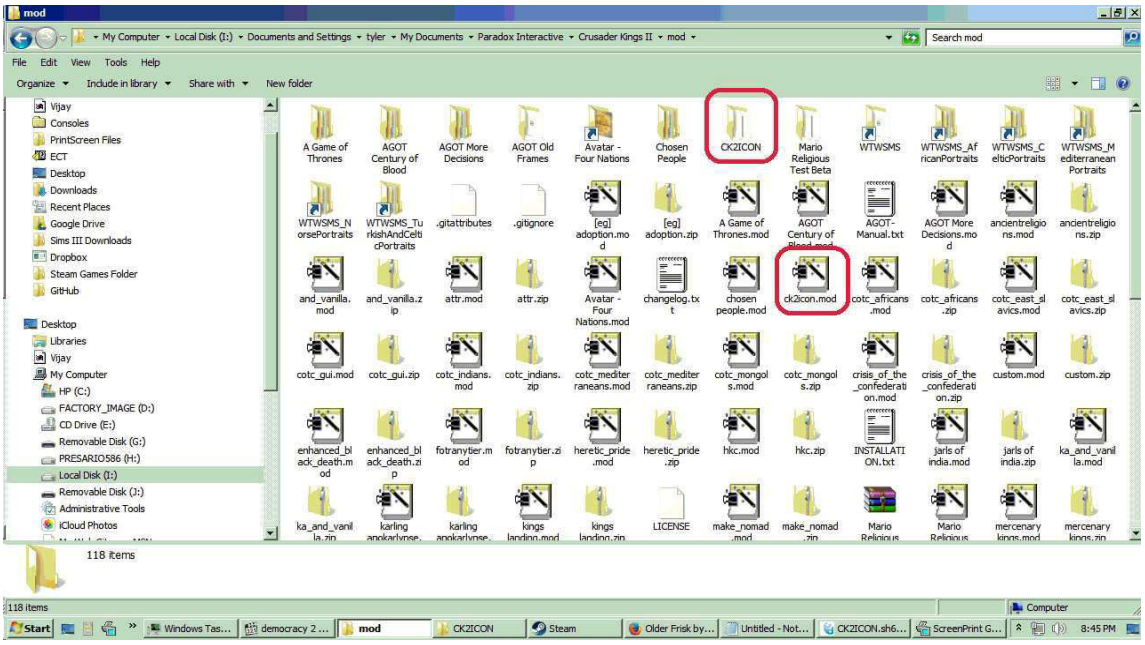

STEP ONE

Download the Mod.

STEP TWO

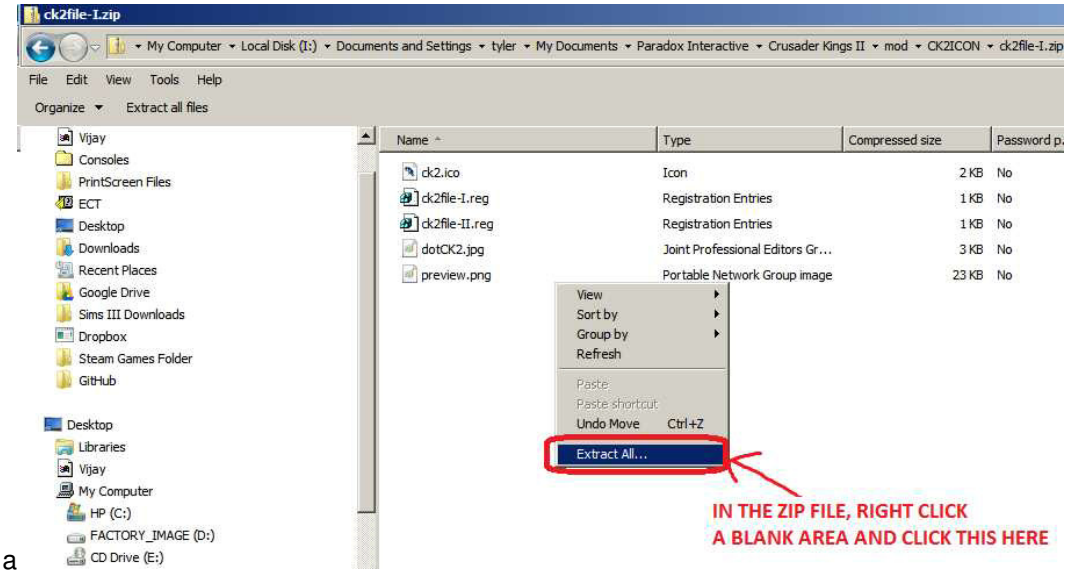

Once the Mod is installed, navigate to your Mod Folder,
found in your My Documents folder.

On Windows Seven computers, the default path is:
"*C:/Users/{YOUR USERNAME}/Documents/Paradox Interactive\Crusader Kings II/mod*

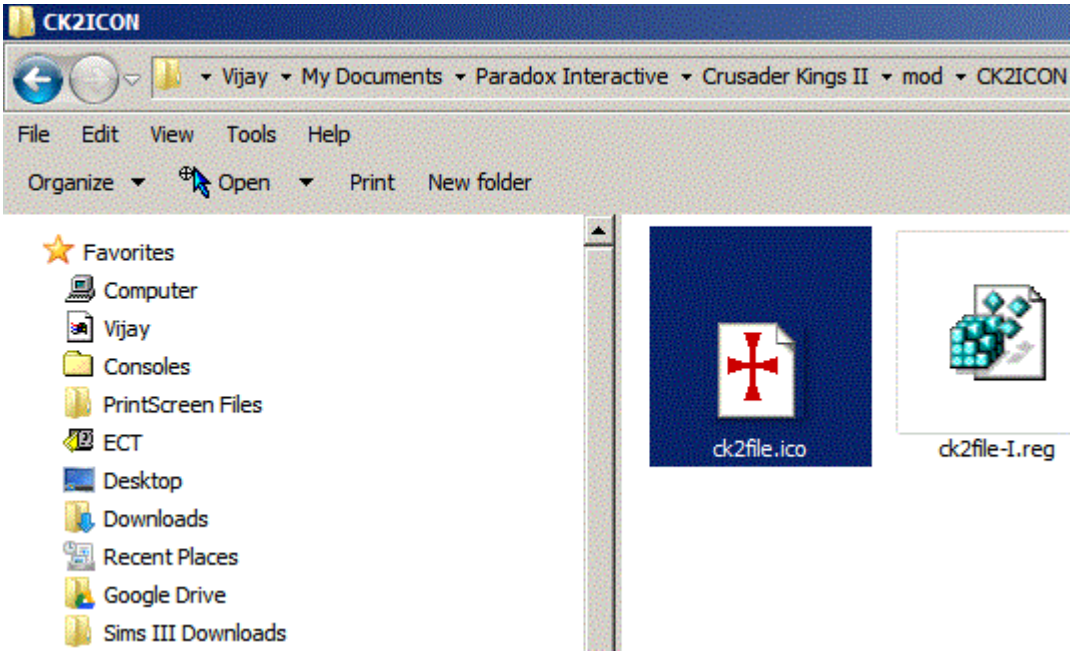

STEP THREE

Once you are there, if the file is encoded in a Zip Format, open it and EXTRACT the file. Should the file indeed be in ZIP Format, it will be named the same as the Mod: "**CK2ICON**".

a

Next, in the directory you extracted, look for and select the icon reading "**CK2FILE.ICO**"

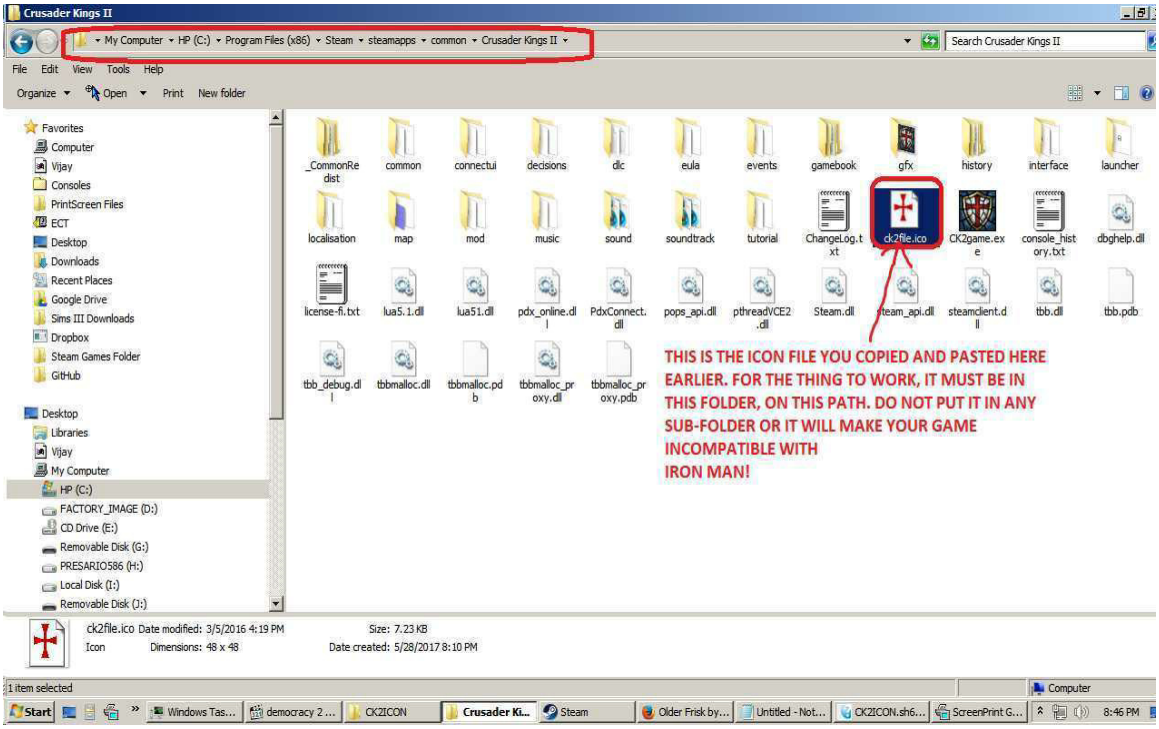

STEP FIVE

Take that Icon and Copy it. Paste it in your "Crusader Kings II" Folder
in your Program Files' Steam Console directory.

By default, this is located at

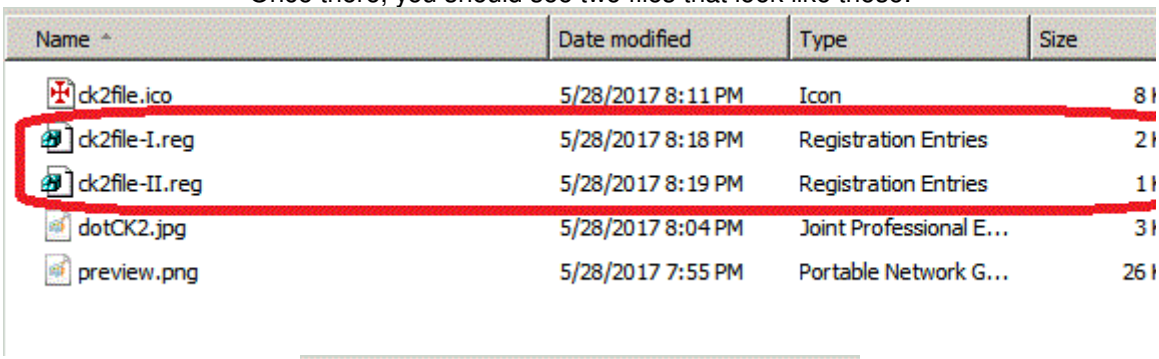

"*C:\Program Files (x86)\Steam\steamapps\common\Crusader Kings II*"

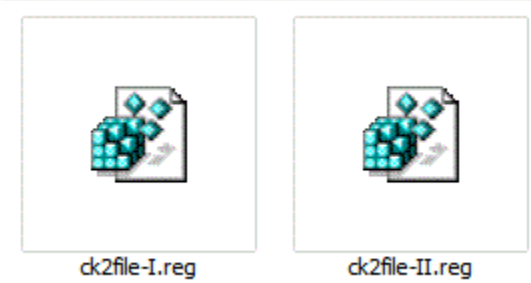

STEP SIX

Return to the folder you previously extracted and initially copied the "CK2FILE.ICO" Icon from.

Once there, you should see two files that look like these:

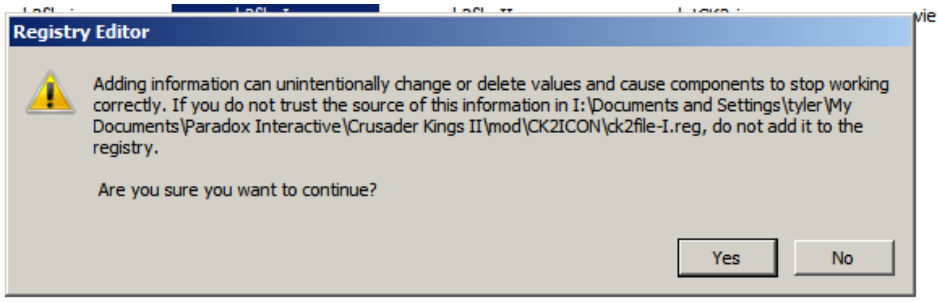

They will have the ".REG" extension and, respectively, are named "CK2FILE-I.REG" and "CK2FILE-II.REG".

STEP SEVEN

Double-click each one. You will see a window like this, asking if you want to add the file to the Registry:

Click "YES".

Do this for both files.

STEP EIGHT

Restart your computer.

That should be all there is to it!

Remember, this will NOT work if you do not follow these instructions EXACTLY.

1. #$kATHIS VERSION OF THE MOD IS *ONLY* FOR SIXTY FOUR BIT WINDOWS COMPUTERS
2. UNDER NO CIRCUMSTANCES IS TURTLESHROOM PRODUCTIONS, STEAM, OR ANY OTHER INSTITUTION PRESENTING THIS MOD LIABLE IN ANY WAY FOR DAMAGE IT MAY OR MAY NOT ALLEGEDLY CAUSE TO YOUR COMPUTER
